

Faculty of Science Indigenous Engagement Grants Guidelines 2023

Science Research Office, 20 March 2023

Objectives and purpose

The Indigenous Engagement Grant scheme recognises the importance of building relationships with Indigenous communities, and works towards removing ongoing barriers that affect collaboration and productivity.

This grant will provide funding to assist Academic staff to:

- establish new relationships with Indigenous communities for future research projects
- cover travel costs for Indigenous community partners to visit the University (and vice versa)
- assist current researchers to continue significant engagement with their Indigenous research partners
- compensate Indigenous research and community partners for their time and expertise.

The Indigenous Engagement Grant scheme is intended to align with, and support the objectives of, the Faculty of Science's [Indigenous Research Strategy](#).

Eligibility and requirements

Applicants must:

- have an academic appointment within the Faculty of Science for the duration of the project
- have a well-outlined research project that involves Indigenous peoples or communities
- complete (or have completed) a Cultural Awareness and/or Decolonisation Workshop
- not have other Indigenous engagement funding available for the proposed project.

The eligibility of proposed projects will be confirmed by the Science Research Office, with reference to the Indigenous Knowledges Institute's [Charter for Research with Indigenous Knowledge Holders](#). Projects must be aligned with the five principles outlined in the Charter.

Successful applicants must provide interim updates on project performance, and/or present on their engagement with Indigenous communities, upon request from the Faculty of Science.

Funding

Successful applicants will receive a maximum amount of \$10,000. Applicants should base the level of funding they request upon their project requirements.

A limited amount of funding is available, and the scheme will close when all funds are allocated.

Applications will be accepted up until November 2023, with funding to be made available within 4 weeks of a successful application being submitted. Funding is available throughout 2023, but all funds must be spent before 31 December 2023.

Selection criteria

Applications for the Indigenous Engagement Grant scheme will be evaluated against three criteria (with equal weighting).

1. Relationship building with Indigenous communities

The project team must demonstrate existing capacity to engage with Indigenous partners, or incorporate relationship development as part of the project. Applications must demonstrate benefit for Indigenous Partner Investigators and/or Partner Organisations.

How does the project do this? How does it involve Indigenous partners? Will it be embedded in an Indigenous community or organisation? What are the partner commitments to the project, research engagements with Indigenous knowledge holders, and/or opportunities for Indigenous knowledge holders to co-develop the project and its research outputs?

2. Advancing Indigenous Knowledge

Does the project aim to advance research into Indigenous Knowledges? To what extent does the project address an identified gap or need in this field?

3. Reciprocity

Proposals must involve mutual exchange of resources and knowledge – i.e. what is the Indigenous community getting out of this exchange? Is there an opportunity within your research to advance community members, such as providing employment or access to data (and can the community use this data to determine community decisions)? What does success look like for the community? Do your Indigenous community partners have the right to ICIP (Indigenous Cultural Intellectual Property)? Has a Memorandum of Understanding been established (for current projects)?

Application and assessment process

- Complete the [online request form](#) to address the selection criteria, outline your research project and explain how you plan to use the requested funds.
- Your eligibility will be reviewed by the Science Research Office.
- Requests will be assessed and endorsed by the Associate Dean Indigenous and Associate Dean Research (or approved delegates).

Timeline

Applications open	31 March 2023
Applications close	1 November 2023
Outcome	Within 2 weeks of application
Funding	Within 2 weeks of approval
